## Status and Perspectives for Liquid Energy Sources in the Energy Transition

Dear Sir or Madam,

a few days before the start of the COP 24 climate conference in Katowice, the European Commission is to adopt a Strategy for long-term EU greenhouse gas emissions reductions towards 2050, reflecting on the ambitious drive taken at the Paris Agreement. Various scenarios are considered in order to best achieve our global climate commitments. In this framework, the role of greenhouse gas-neutral energy sources and technologies in the heating and transport sectors is of utmost importance.

A new study carried out by Prognos AG is looking into the status and perspectives of liquid energy sources and their possible contribution to the energy transition.

Join us on

**Wednesday 21 November 2018**

**from 17:30 to 19:30 hrs at**

**The Hotel. Brussels**

**Boulevard de Waterloo 38, 1000 Brussels (Belgium)**

for a presentation of this study and a debate with renowned experts from institutions, industry, civil society organisations and the academic world about Europe's future energy supply and the perspectives for liquid energy sources.

Please mark already your diary (**Add this meeting in Outlook**). An invitation and a registration form will follow shortly.

We look forward to seeing you soon in Brussels!

Yours sincerely
